PROJECT EXPERIENCE

MOScoreBo — Missouri Science Bowl Scoring Application

Technologies Used: Angular 11, Angular Material, DynamoDB, Amazon S3

- Developed and deployed scoring application in TypeScript to allow administrators and volunteers to record and manage competition data and calculate scores of competing teams from Missouri schools.
- Increased accuracy of score records, saving administrators two hours of event management time per-use; enabled them to correct approximately five errors on scoring forms per event.
- Enhanced user interface to ensure smooth application interactions; allowed administrators to utilize editing feature with password protection.

Organizely — College Student Personal Planner

Technologies Used: Angular 11, C#, ASP.NET, Bootstrap 4

- Developed a personal planner for college students to keep track of their courses, assignments, and tasks.

WORK EXPERIENCE

Records Clerk III — Kemper Corporation, Maryland Heights, MO

June 2015 - August 2016

- Managed company's records, filing system, and confidentiality to keep information secure.
- Scanned, edited, and indexed ~2,000 pieces of mail accurately, easing access and increasing speed for operations.

Office Support Assistant — Above All Personnel, Saint Louis, MO

June 2014 - December 2014

- Managed confidential government office records and the filing system as a contract employee.
- Received, organized, logged into the Division of Social Services' database, and distributed incoming mail to appropriate employees.
- Trained new contract employees on office procedures.
